Lori Mulso

I would like to express my own view on your new water regulation's , First of all I have live in Trinidad all my Life.

I work in the gas field for 9 Years and have seen a lot of things.

I Have been a hunter for 20 years and in all this time there has never been this much wild life

And its due to the water we Discharge, If we Pass these new Regulation's there will be a impact it will Have on our town .

For one XTO give back to our communities . We could use this water for all our lake a Park. It help Rancher it also create Jobs & revenue for the state.

Thank You for your time.
